DETAILED ACTION

Examiner acknowledges receipt of the amendment filed on 18 June 2003. In this amendment, applicant amended claims 1, 10, 20 and 21; canceled claim 9; and added claim 22. The remaining claims were left unchanged. Because of the amendment to claims 1, 20 and 21, claims 1-8 and 10-21 are condition for allowance. Claim 22 is rejected for the reasons stated below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,471,378 to Ng.

Ng discloses an solid-state imaging sensor, comprising a photo cathode 16 having an input side for receiving light from an image, and an output side from which electrons produced by the photo cathode; a microchannel plate 20 having an input surface positioned adjacent to the output surface of the photo cathode, an output surface from which an increased number of electrons exit, and a plurality of channels formed between the input surface and the output surface; a solid-state imaging device 52 (CCD) having an electron receiving surface, positioned adjacent to the output surface of the microchannel plate, for receiving the increased number of electrons

Art Unit: 2878

output from the microchannel plate, and an output for outputting an intensified image signal; a vacuum body holding the photo cathode, microchannel plate and CCD together as a unit (col. 7, lines 3-13). Ng fails to disclose that the image is that of a CMOS imager employing a CMOS sensor. The advancements in imager technology is responsible for CCD-type imaging devices being replaced with CMOS imagers due to the compactness of the size CMOS sensor, to the decreased expense in producing this device and to the technology enabling a high level of integration of an image array with associated processing devices. Therefore, it would have been obvious for one of ordinary skill in the art to replace the solid imager of Ng with an imager based on CMOS technology, since they are functionally equivalent.

Allowable Subject Matter

Claims 1-8 and 10-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 20 and 21 are allowable, because the prior art fails to disclose, either singly or in combination, an intensified solid-state imaging sensor wherein an insulating layer separating an output surface of the electron multiplying device and an electron receiving surface of the solid-state image sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rhodes discloses a CMOS imager that discusses the reasoning behind replacing solid-state imagers with those based on CMOS technology.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
